

To Future Parents of Kiddie Shack:

Putting your child in any daycare is one of the hardest decisions a parent has to make. When we made this decision together, we knew that we wanted our son to be in a place he could be comfortable in an in-home environment. There are many public daycares that are too cold and don't give the one-on-one attention that they might proclaim. One-on-one attention is what every child needs. Kiddie Shack Daycare offers not only this kind of attention to their children but they also learn in groups. In our son's first week of care, we discovered that he learned how to crawl and to take a nap in a group setting during nap time. Absolutely incredible!

Since we both work in the education industry, it really impressed us that Kiddie Shack offers a strong curriculum they have put in place for each child. Not only will this help them grow but it will help them prepare for school when the time arrives. The atmosphere of the daycare itself is setup like an elementary classroom, which you will NOT find in just any in-home facility.

A daily routine is important to have in place for any child. This way they become comfortable and know what to expect. With a routine schedule in place, we know what our son is doing at each time throughout the day. Lunches are also published on a monthly basis. This is very important to us as we can plan dinners for the entire week, so our son can be exposed to different foods.

We are very pleased and fortunate to have discovered the care of Kiddie Shack run by Donna and Sabrina. The communication we have with them is tremendous and it relieves us both to know that our son is learning in a classroom environment, while being safe and secure. We definitely recommend Donna and Sabrina as caregivers to any parent making one of the hardest decisions one can make.

Sincerely,

Kristi & David Wasemiller
